

Compact design ideal for customer-facing environments

fi-70F Document Scanner

Made for fast-paced environments, the fi-70F flatbed scanner rapidly scans documents in a mere 1.3 seconds (A6, Color, 200 dpi) or less. Quick 0.5-second startup time guarantees short wait times. Coverless scanning eliminates the repetitive task of opening and closing the scanner before and after each capture; users can rapidly scan multiple documents by pressing the front-mounted Scan button. Intelligent, built-in image processing functions like Automatic Cropping, Automatic Rotation, and De-skew enable you to confidently deliver high-quality images of small cards without manual alignment.

Image Quality

Sophisticated image processing functions such as Auto-Cropping, Auto-Rotation, and De-skew allow users to scan high-quality images confidently without the need for manual alignment.

A Machine-Readable Zone can extract and digitize data such as name, document number, and nationality from passports and ID Cards for quick capture of scanned information.

Compact design to scan anywhere

A truly compact scanner, the fi-70F fits in cramped spaces, such as customer-facing reception desks, and rapidly scans all types and sizes of documents – from small cards, such as driver's licenses, passports, insurance cards, and credit cards, all the way up to full-size A6 documents.

Efficiency

A cost-effective flatbed model, the fi-70F delivers high (up to 600 dpi, 24-bit color) output without compromising efficiency. The unique ability to draw power from a computer USB port means it can be used even in locations with no AC power. Consuming 6 W or less power, the scanner and its manufacturing process comply with strict environmental standards, including ENERGY STAR® and RoHS.

PaperStream IP

Compatible with all major document management software packages. PaperStream IP is a TWAIN/ISIS® compliant driver that cleans up and optimizes scanned images reducing rescans and improving downstream data accuracy.

PaperStream Capture

Output PDF, TIFF, JPG BMP with a single click. OCR and Machine-Readable Zone can extract data from documents, passports, ID cards, etc. Built-in profiles (color, B&W, auto color) save time.

PaperStream Clickscan

Operators can quickly scan documents without administrators needing to preset scan settings or destinations. "Push" or "pull" scans can be done with just a few steps.
